Terms of Service

Network

Seamless scalability, burstable bandwidth and a 99.95% uptime.

Benefits

Operating via private peering connections and public Network Access Points (NAPs), our expansive, redundant network was designed to offer a forward-thinking alternative to the existing network options. NAC utilizes multiple major upstream providers and more than 200 peering partners to ensure continuous Internet connectivity, greater route diversity, and ultimately, enhanced Internet performance. This strategic combination allows customer traffic to be routed over the best available connections. If the Internet is an important part of your business, Peer 1 Network can make the difference you need to stay ahead.

Connectivity
